

Bubble Trouble

What you will need

- Washing up liquid or shampoo.
- Water or a rainy day.
- Stiff outdoor brush or scrubbing brush.

How to do

1. Pour the shampoo or washing up liquid on to the floor.
2. Add some water.
3. Let the children brush the suds.

How to Extend

You could carry this activity out in a tray on a small scale.

Add colour with food colourings.

On a warm day let them use their bare feet to mix it.

Ride a bike or scooter through it to make patterns.

Learning opportunities.

Using the brushes in big movements will help to develop the children's gross-motor skills. It also builds their upper body muscles and co-ordination too.
