

# Rainbow Fish Number Game

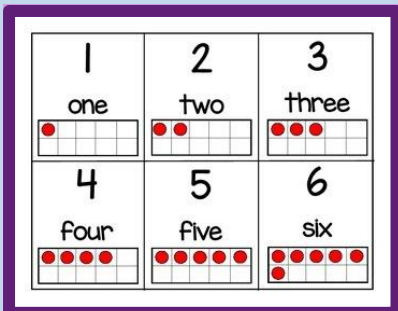

## Learning Opportunities

Children are learning about number names and quantities of numbers while playing. It provides opportunities to count actions as they place each scale.

Also number correspondence match quantity to numerals.

To extend their Learning

Encourage them to compare the different numbers and the quantities. Do you think that is more than or less than last time?

## You will need –

Number cards 1-5- or 1-10

A paper fish shape

Scales - Sequins, buttons or small pieces of paper.

## To play

1. Place the number cards face down.
2. Ask your child to pick a card.
3. Look at and count the number.
4. Then place that number of scales on to your fish.

## To extend-

You can make more characters from the story. You can make them three different sizes.

You could make them bigger if you use and use larger numbers such as 1-20.
