

Shadow Drawing

Make your own drawings using the sunshine to help you!

What you will need:

- A sunny day
- Plain white paper
- Small toy animals
- Pens/Pencils

What to do:

1. Find some small figures, they could be jungle animals, farm animals, whatever you have around. Place them so their shadow falls onto a sheet of paper. It does not matter what the figures are if their shadow is obvious.
2. Carefully draw around the shadows. You might need to move around the picture and draw it from above so you can see the shadow.
3. Have lots of fun colouring in your drawing!
