

Peg fan

You will need:

- Seven clothes pegs
- Glue (wood glue/ glue gun is great for this)
- Felt tip pens
- Paper

What to do:

1. Glue pegs together, long side against long side.
2. When the glue is set, clip felt tip pens into each of the pegs.
3. Holding your peg fan in the middle, draw with all of the pegs at once.

What's in it for the children?

Because the children are not directly holding the felt tips and they are making multiple marks at once, this activity requires greater concentration and hand eye coordination. Children can find it challenging to keep all of the felt tips level and moving at the same time.

Taking it forward:

Have a go at:

- Trying different numbers of pegs.
- Holding the peg fan in both hands when you mark make.
