

## Using hoops, balls, ropes, and cones

### Play scoring games

Play scoring games with balls, quoits, or bean bags. Draw targets, tracks or starting lines on the wall or ground using chalk. Use small whiteboards or blackboards for scoring. Put up simple goals for football.

### Sort the children

Sort the children into different sets- e.g., boys/girls; long/short hair; show colour; age. Collect the different sets of children inside hoops, in ropes or in circles chalked on the ground.

### Make skittles

Fill empty plastic bottles with sand or gravel, stick a number on each and play with a soft ball.

### Race games

Mark some simple tracks for racing (children or toy cars). Use these to learn about first, second, third etc. (Ordinal numbers)

### Play hoop jump

Put some different coloured hoops on the ground. Call a colour and the children must jump in the right hoop. Change the fun by asking them to jump, hop, crawl, walk backwards or jump from hoop to hoop. You can draw hoops with chalk on the ground.

### Play ball games

Find a really big box and cut holes in the sides. Mark each hole with a score from 1 to 3 and make a scoring game by throwing small balls in the numbered holes. A child can get inside the box to fetch the balls out again!
